

TAFE_OPEN WIFI SETUP

ios

Before you start.

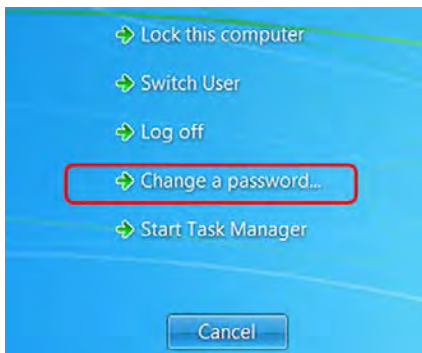

If you were provided with a temporary password for your new account please ensure you have logged into a TAFE computer and set a new password before attempting to connect to the TAFE_OPEN WiFi network.

If you have a working password please go to the next section *Steps to Connect to TAFE_OPEN*.

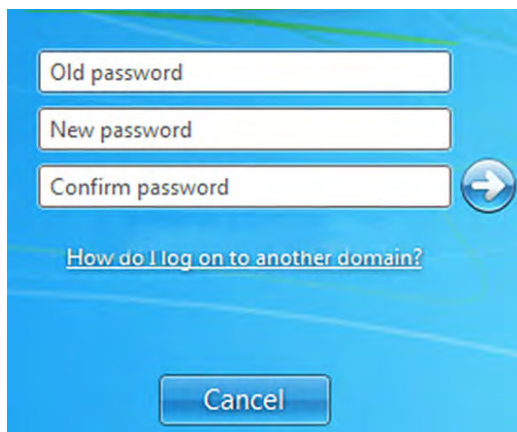

1. To Log in using your temporary password press CTRL + ALT + DELETE

2. An option Screen will appear. Click *Change a password*.

3. Fill out the three blank fields. Enter your temporary password.
Provide a new password and confirm it.
Click the arrow button to proceed with password change.

Steps to Connect to TAFE_OPEN

1. To connect to TAFE's Wifi, open the settings app.

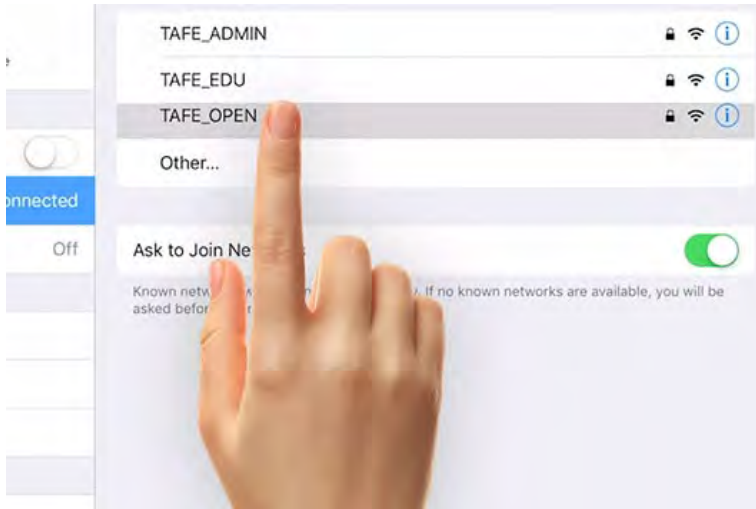

2. Select the Wifi option on the left of your settings app.

3. You will now see all the available Wifi networks in your area.

Select the network called TAFE_OPEN.

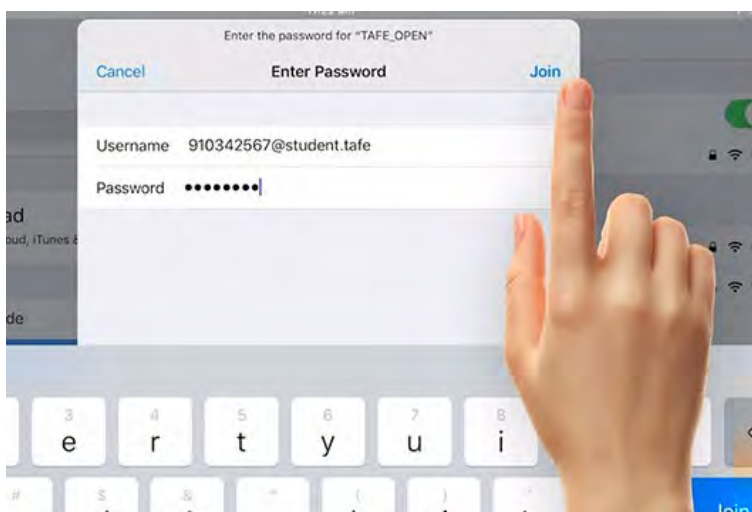

4. Enter your username and password.

Your username uses your student ID number in the following format like this example.

studentnumber@student.tafe (e.g. 123456789@student.tafe).

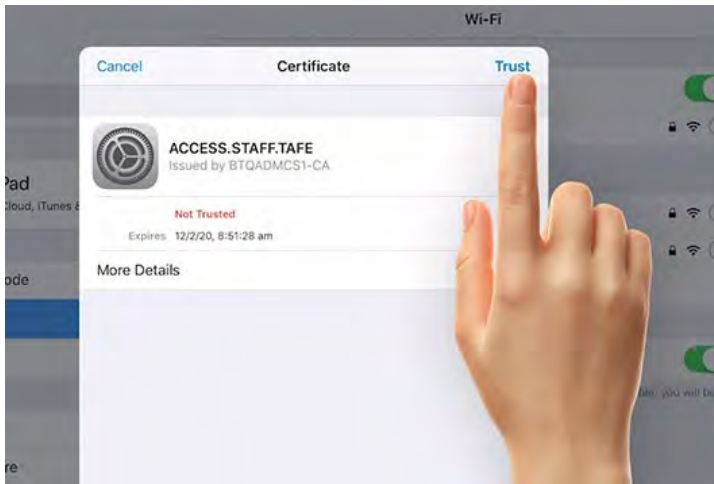

Your password is your network password.

Select *Join*.

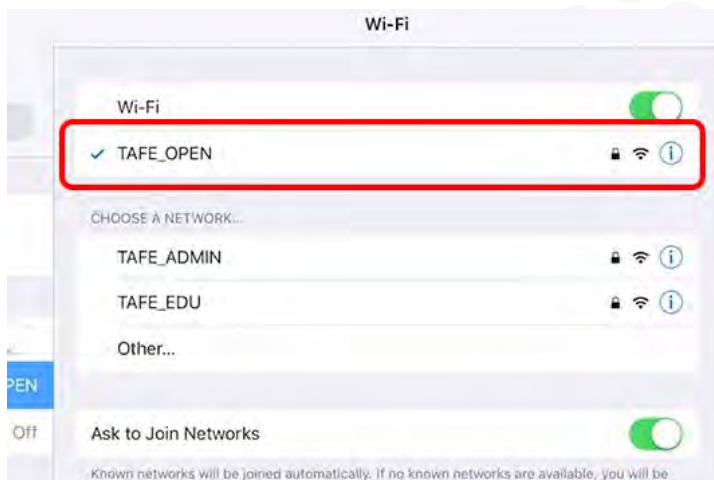

5. A certificate will appear asking you for further confirmation.

Select *Trust*.

6. The device will now take a moment to make the connection to the TAFE_OPEN network.

A successful connection will now be confirmed with a tick next to the network named TAFE_OPEN.

If you have forgotten or need to reset your password, use the TAFE Password Manager located on the Technical Support page.
